**Student Remarks**

Very enthusiastic professor. The course relies too much on Griffiths, however. The curriculum should be suitably modified be more expansive.

this course was an excellent course. we liked it so much. thank you for providing this course to us.  
i felt that if more questions were included in the tutorial would be nice.  
it would be better if the solutions for additional problems in the tutorial were also provided to us.

Sir.

Please donot reproduce griffiths try to teach physics not entirely maths.

Sir, though you cover everything that is necessary, it does get kind of monotonous sometimes when you only teach us what Griffith's can teach us. We would enjoy it if you could give the course a bit of your own flavour as well. Otherwise it remains Griffith's course, not yours.
