Question list
1.The course objectives were stated clearly and met largely
2.The concepts of the course were communicated well
3.The instructor was enthusiastic about the topics presented
4.The examples/case-studies/illustrations used in the class improved the learning experience
5.The quizzes and exams were graded in an impartial and timely manner
6.The instructor was punctual and followed the class schedule closely
7.The course was planned and structured well
8.The course motivated me to explore the subject area with interest
9.The involvement of TAs helped effectively in improving the learning experience
10.Tutorials and assignments were conducted effectively
11.Overall, the course provided a good value-addition to my knowledge/skill-set

NOTE:Qn 1 to 6 - Instructor evaluation : Qn 7 to 11 - Course evaluation

Student Remarks
needs to be more structured
The explicit derivation of a few theorems and results that are highly detailed can be skipped and more examples pf the topics that are taught can be done.
I really liked the course and they way it is structured. This was definitely my favourite course for this semester.
it was a very informative course
course covering a lot of fields in electrodynamics and magnetostatics.
1.The beginning of quantum physics was Difficult to grasp.It could have been simplified by giving adequate background.eg blackbody radiation. 2.More application level questions should be asked in the quizzes to give consideration to students who has practiced well for the exam!
use of fancy English isnt necessary in class and turns out to hinder our interest towards listening to class.
good in all aspects.
The teaching method suited some topics like conductors and etc. where a lot of theory was required, but the example problems could have been done more detailed.
Was extremely interested in the magnetism part of this course
