Student Remarks
The course was extremely well planned and structured out with relevant illustrations from different branches of physics. Towards the end inorder to draw closure, a few topics (topological defects and few aspects in GR) were not adequately discussed but rushed through. The instructor must time the duration of his examinations depending on the length and complexity of the problems being asked and not assume anything else.
Its a great course for exploring different areas of theoretical physics
This is the best course which i have experienced till now. everything is so perfect....lectures, exercise sheets, punctuality, etc etc.
It was one of the best learning experience of my life and Sriram sir is one of the best teacher that I have been taught ever. Whenever I ask questions in the class ,my classmates used to tell me how I am disturbing the class but sir never irritated and gave answers to my questions with blessings and also understood my questions knowing I am not able to frame the question properly because of my weak spoken English .I want to thank sir that he motivated me to pursue research in the topic .Ty sir
Brilliant teaching and course planning. At times, presentation of concepts was a bit fact based compared to the usual intuition based. Overall, this was a very complete course and Sir taught it in an excellent manner.
This was a good course taught very well by the extremely disciplined and strict professor. A great experience overall.\n
I think he is the one for whoom I feel blessed to come IIT
